

Education

Master's in Global Development Economics | *Boston University, MA* 2023-2025

- **Award:** Prize for Academic Excellence in the Economics Master's Program
- **Selected Coursework:** Econometrics, Environment & Development, Global Development Capstone, Money & Financial Intermediation, Global Policy Analysis, Data Science with Python

Bachelor in Economics, Minor in Mathematics | *Colorado State University, CO* 2018-2022

- **Award:** Dean's List
- **Selected Coursework:** Development Economics, Applied Statistical Methods, Introduction to Econometrics, Money and Banking, Calculus I–III, Linear Algebra

Projects

Climate Change and External Fragility: Lifeline Fund as a Financial Arrangement for V20 Countries 2026

- Analyzed the economic logic and de-risking financial mechanisms of the V20 Lifeline Fund to mitigate macro-financial shocks for 68 climate-vulnerable economies.
- Implemented a Local Projection Model to trace the dynamic impulse responses of macroeconomic stability over a 5 years forecast horizon following climate shocks. Simulated counterfactual pathways to quantify how specialized financial injections safeguard fiscal space and reduce long term external fragility.

World Bank Shareholding Formula Reformation 2025

- Evaluated the IBRD Dynamic Formula for subscription shares using data on 189 member countries, identifying systematic underrepresentation of developing countries and lack of climate considerations
- Designed a Carbon Adjusted Formula incorporating indirect IDA contributions and cumulative CO₂ emissions, improving equity and aligning with the Bank's climate and development mandates.

Debt Sustainability and Commodity-Linked Bonds 2025

- Analyzed how commodity-linked bonds could serve as countercyclical instruments for debt distressed economies using Vector Error Correction Models
- Examined portfolio optimization for Ghana, Mongolia, Ethiopia, and Malawi, demonstrating significant reduction in import volatility.

Water Access, Livelihoods, and Distributional Outcomes in Central India 2024

- Analyzed the impact of water access on agricultural productivity and household income using survey data from 1,500+ tribal households in Jharkhand, India.
- Cleaned and validated inconsistent field data, including missing household heads and inconsistent land shares, to support reliable empirical analysis.
- Conducted cross-sectional regression analysis showing a 23% increase in agricultural yields from improved water access, while ethnic disparities persisted after controlling for land quality.

Experience

Research Assistant | *Boston University Global Development Policy Center, Boston, MA* 2024 – Present

- Focus on core research areas including: Climate Finance, Global Financial Architectures, and Technology Policy.
- Investigate how international financial system affects the sustainable transitions in emerging economies.
- Execute data mining, quantitative modeling, data visualization, literature reviews, blog article conducting, and policy report drafting across the research lifecycle.

Teaching Assistant | *Boston University, Boston, MA* 2024

- Courses: Economics of Less Developed Regions and Economics of Legal Issues.
- Graded assignments and exams, held office hours, and supported students in applying economic reasoning to development and institutional questions.
- Facilitated discussions, provided additional resources, and contributed to course content development.

Research Assistant | *Boston University, Boston, MA* 2024

- Digitized historical documents for research on institutional legacies, supporting structured data creation for empirical historical analysis.

Volunteer Teacher | *Qinghai, China*

2023

- Taught art and music classes to over 150 K2–K6 students in a remote boarding school and collaborated with local educators on lesson planning.

Community Engagement

Leading Member | *Philanthropy Association of Xi'an City*

2025-present

- Conducting literature reviews evaluating institutional support structures for mental health of children and adolescents aged 6–19, for the upcoming project.
- Help drafting pilot survey and coordinating with a cross-functional team of local educators and healthcare professionals.

Representative of Graduate Economics Association | *Boston University*

2023-2024

- Coordinated communication between students and faculty on curriculum design, academic resources, and career development.
- Organized over 20 times community events and research workshops, significantly increased student participation rate.

Skills

Quantitative Analysis

- Proficient in Stata, Python, R, LaTeX, and Excel.
- Extensively experienced processing panel data or time-series data. Adept at implementing mainstream econometric methods including Logit, Ordered Logit, Propensity Score Matching (PSM), Instrumental Variables (IV), Difference-in-Differences (DID), PSM-DID, and Local Projections (LP).
- Well-versed in major statistical learning methods including: Support Vector Machines, KNN, Decision Trees.
- Highly experienced extracting and structuring data from LSEG, IMF IFS, World Bank WDI, UN Comtrade, EIU, and global emissions databases.

Communication: Excellent in English and Mandarin, with elementary level Spanish.
